

Invitation to a breakfast conference

GDPR, one year on: What controls for what penalties?

The European General Data Protection Regulation (**GDPR**) has been in force throughout the European Union **since May 25, 2018**.

Since that date, bodies and organizations that process personal data are supposed to be in compliance with this Regulation.

Breaches of this Regulation, investigated by the CNIL (French Data Protection Authority) who has been granted extended powers, may result in penalties of up to 4% of the annual turnover.

The first anniversary of the GDPR provides an opportunity to **present in concrete terms the CNIL's control and sanction logic, as well as to share our thoughts on a selection of formal notices and financial penalties.**
